Reviews

The publication is great and fantastic. It is probably the most remarkable book i actually have read through. Its been printed in an exceedingly easy way and it is merely right after i finished reading through this publication where in fact altered me, modify the way i think.

Excerpt: .be required, of 100 ma. each, to accomplish a single cauterization. As different portions of the canal are operated on each day the applications can be given as frequently as once a day. If a patient will tolerate a 200 ma. current, double the surface may be operated upon by employing an electrode of 8 sq. cm. surface. However, I have obtained the best results from small electrodes. When a large surface is exposed, the unequal conduction is such that certain portions are over cauterized while others are neglected, and the work is not satisfactory. When the internal electrode is withdrawn, at the end of each application, the depth of the uterine canal should be noted, and this together with the diameter of the electrode employed recorded on the record of the case for each particular day. Oftentimes one of the most difficult parts of the operation, owing to the distortion of the canal, is the introduction of the electrode. I have been obliged in a number of cases, to postpone treatment from day to day for a number of days, on account of being unable properly to adjust the electrode in the uterine canal. I have seldom found a case, however, if the cervix was within reach at all, in which, after more or less persistence, I have not been rewarded finally by being able to traverse the canal with the flexible electrodes which I have described. After once accomplishing an entrance and...
