Designing America's Waste Landscapes (Hardback)

By Mira E. Engler

JOHNS HOPKINS UNIVERSITY PRESS, United States, 2004. Hardback. Book Condition: New. 2003. Corr 2nd ed.. 235 x 157 mm. Language: English . Brand New Book. One of the physical costs of our society's breakneck consumption, sprawl, and technological innovation and production is the increasing amount of terrain relegated to accommodating the resulting waste and wasted space. These marginal landscapes can be divided into four distinct categories: sinks; ruins or abandoned land; toxic or damaged land; and waste landscapes. Although Professor Engler discusses all four types, she is concerned mostly with waste landscapes - landfills, recycling and waste transfer centers, and sewage treatment plants, as she addresses two distinct aspects of waste landscapes: 1) the historic and cultural context of waste, and 2) the professional planning practices and aesthetic concerns of those who deal with waste and its landscapes. Ultimately, Professor Engler seeks to change our ideas about waste places through her discussion of how landscape design can function within the scientific and technological parameters of safety and environmental concerns to make waste places more central to our thinking and perception. In so doing, she reviews the physical evolution of waste sites, and scrutinizes perceptions and representations of these landscapes,...
